

Logos Payments

logospayments.com

Logos in brief

We are committed to driving innovation in unattended payment solutions. From our roots in Denmark, we have evolved into a regional leader by delivering seamless, self-service payment experiences across multiple industries

- Agile Nordic development organization (70 engineers) doing product development, customizations, co-creation and projects to build feature-rich payment solutions to a wide range of verticals
- Strong references with 3.000 customers across 10 markets (primarily in the Nordics)
- Installed base of 40.000 payment solutions
- Handles 350.000+ transactions daily
- More than 25 years in self-service payments
- 190 employees
 - 35 service technicians in Denmark
- EUR 40 MDKK turnover

We create leading self-service payment solutions across a wide range of industries – with special focus on mobility

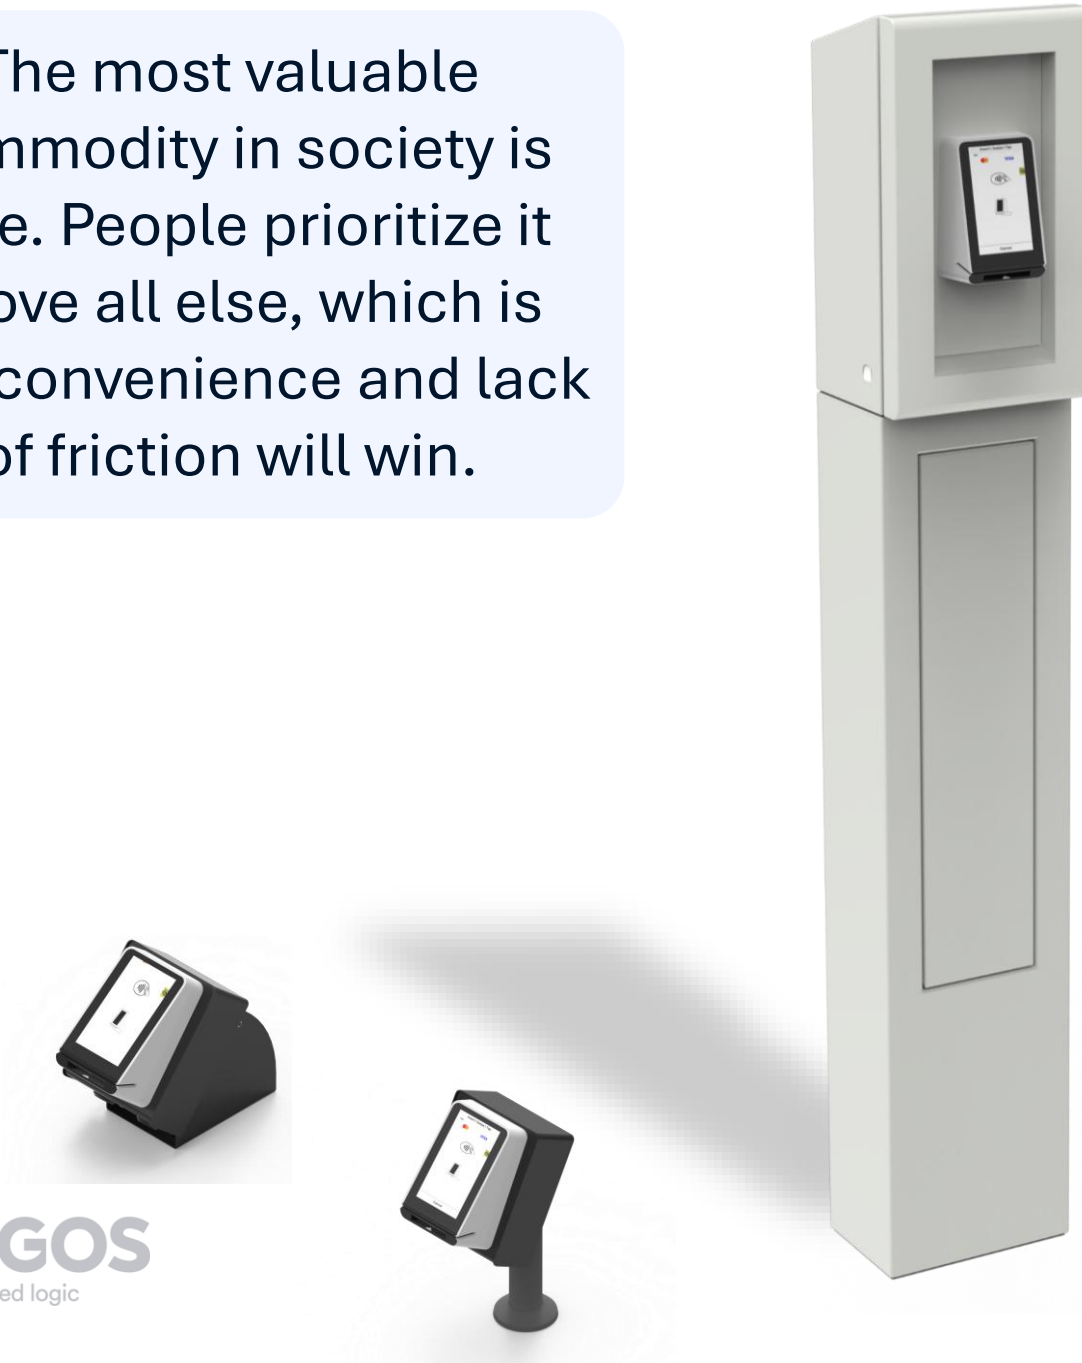

The most valuable commodity in society is time. People prioritize it above all else, which is why convenience and lack of friction will win.

Our Vision

We want to be recognized as the leader in frictionless self-service commerce, empowering people and businesses to embrace a world of endless availability and convenience.

Our Mission

Our mission is to develop innovative unattended payment solutions that continuously simplify the complex. By doing so, we help businesses across all industries drive growth, reduce operational costs, and elevate customer experiences to new heights.

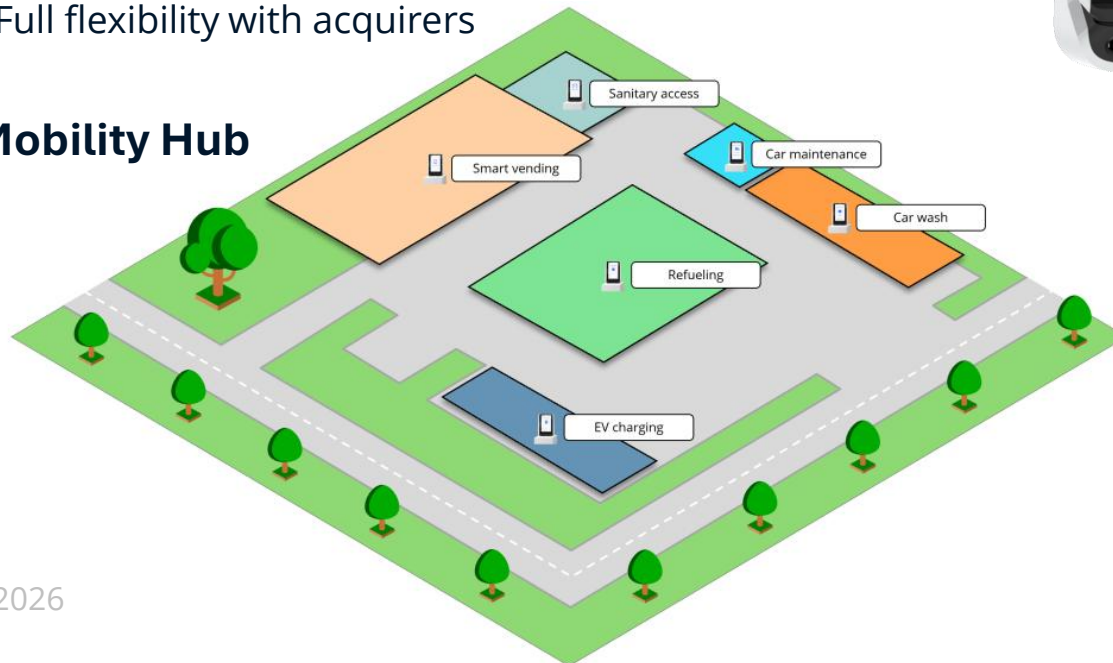

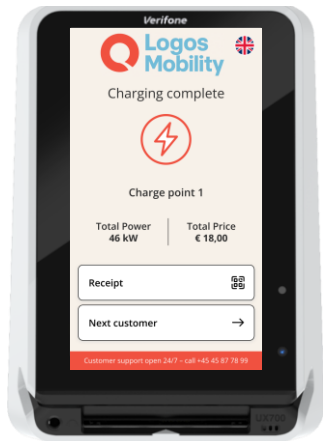

The UX700 terminal across unattended use cases

Logos All-in-One platform provides these benefits:

- Faster development cycles with one (Android) platform and public roadmap
- Feature rich UI and familiar customer journey across use cases
- Reduced installation, maintenance, repair and training costs – one device across multiple use cases
- Support for all payment types (EMV-, fleet-, and local cards) and cross-sell and loyalty between use cases
- Full flexibility with acquirers

Mobility Hub

Self-service CX journeys

Logos All-in-One for Smart Vending

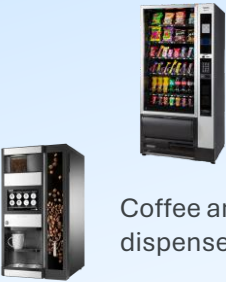

Logos All-in-One for Smart Vending enables seamless and intuitive payment experiences across a wide range of vending machines powered by the versatile MDB protocol or through Cloud POS integrated via Logos Cloud interface (LUCA)

Key features

- **MDB 4.2** ensures compatibility with a wide range of devices in **automated vending** while maintaining backward compatibility with previous MDB versions. This allows for seamless integration without the need for extensive upgrades
- Support for **Smart Vending** via Cloud POS integrated via Logos Cloud interface (LUCA) to smart fridges
- 5” high-res screen offers **rich customer journeys** from product selection, payment and receipt
- **Multiple payment models:** single step, dual step, or a combination
- Support for **eReceipt** via QR code or SMS
- Use **Logos PayManager** and **Logos Vision** to manage and monitor all Logos All-in-One terminals. In-depth **reporting** and insightful **transaction overviews** to drive informed decision-making
- **Public API** to support integration to apps and external systems
- Certified for **PCI 6** and **EMV**
- Support for **customer-specific skins** (logo, colors, branding and videos)

Key scenarios

Coffee and hot drink dispensers

Snack and soft drink vending machines

Arcades and amusement rides

Smart fridges and freezers

Intelligent housing options

Flexible acquiring

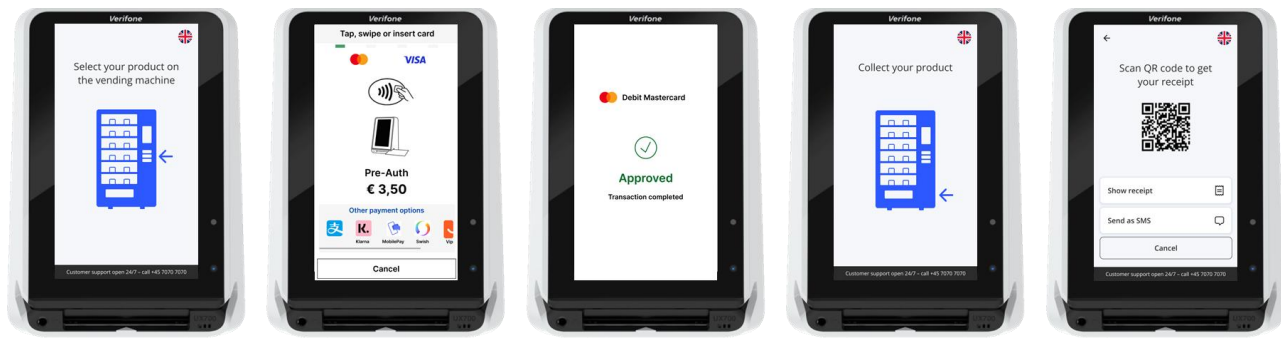

Accepts all types of payment methods
